

POLLUTION PREVENTION

/ 215 Pollution Prevention Points

- 5 Have a pollution prevention spill kit, create and post a spill plan, and train staff.
- 5 Ensure that lids remain closed on waste, recycling, and compost containers located outside. Check for and repair leaks.
- 5 Keep receiving areas, loading docks, and parking areas free of litter, oil drips, and debris.
- 5 Empty all water used for cleaning in an indoor drain such as a utility sink. Never dump this water outside.
- 5 Properly store and use secondary containment, such as a bin or tub, for all hazardous materials.
- 5 Identify, properly label, and take steps to reduce all hazardous waste used or generated onsite.
- 5 Properly dispose of any hazardous waste.
- 5 Immediately contain and properly dispose of leaked vehicle fluids by using drip pans and spill response materials.
- 5 Eliminate the use of degreasers that contain chlorinated solvents (like perchloroethylene (PERC), trichloroethylene (TCE) and methylene
- 10 Avoid pressure washing so that pollutants like dirt, soap, and chemicals are not washed into storm drains
- 10 Use cleaning products certified through Safer Choice (EPA Program), GreenSeal, or other programs whenever possible.
- 10 Select non-toxic, low- or no-VOC products, fixtures, and finishes.
- 10 Use only zinc-free flux and lead-free solder.
- 10 Use propylene glycol antifreeze instead of ethylene glycol.
- 10 Use rust removers that do NOT contain hydrofluoric acid (HF).
- 10 Use a system that re-circulates and filters cleaning solution. Enzyme additives can extend the life of cleaning solution.
- 10 Use an industrial laundry service for shop rags and uniforms.
- 10 Use a waterborne paint system.
- 10 Use an enclosed, automatic system for washing solvent-based paint from paint guns.
- 10 Use a computerized mixing system to track product and VOC usage.
- 10 Obtain hands-on training to improve your spray application technique and transfer efficiency.
- 10 Recycle or reuse oil, coolant, spent solvent, and antifreeze.
- 10 Segregate, drain, and recycle used oil filters.
- 15 Inspect storm drains quarterly. Clean them if they are more than half full, or if directed by local stormwater utility.
- 15 Label all stormwater drains with "no dumping" message.

SOLID WASTE

/ 50 Solid Waste Points

- 5 Recycle all paper, cans, bottles, jars, and cardboard allowed in your service area.
- 5 Monitor your internal and external waste collection bins to identify areas for improvement.
- 5 Post signage and labels on garbage, recycling, and compost bins showing what's accepted in each.
- 5 Place garbage/recycling/compost bins together to maximize recycling and reduce contamination.
- 5 Purchase paper products made from at least 30% post-consumer recycled content.
- 10 Set all printers to default to double-sided printing.
- 15 Implement paper towel composting or use high-efficiency hand dryers in restrooms.

TRANSPORTATION

/ 80 Transportation Points

- 5 Adopt a transportation program that encourages employees to walk, bike, rideshare, or take transit as their primary commute method.
- 5 Use alternative transportation (e.g., walk, bike, transit, carpool, EV) for local work-related trips whenever possible.
- 5 Reduce shipping impacts by consolidating deliveries and requesting low-emissions transport.
- 5 Encourage a "no idling" policy for deliveries to and from your site.
- 10 Implement a guaranteed/emergency ride home policy for employees who do not drive alone to work.
- 10 Provide your employees with easy access to transit passes through a pre-tax payroll deduction program and/or shared cost or full subsidy.
- 10 Offer secure bike parking for employees.
- 15 Provide electric vehicle charging stations.
- 15 Have >20% of company-owned vehicles be low- or zero-emission models (e.g., bicycle, EV, hybrid)

WASTEWATER

/ 20 Wastewater Points

- 5 Place strainer baskets in sink drains to catch food waste. Put food waste in the compost bin, if available in your service area.
- 5 Post educational signage in restroom stalls indicating nothing but toilet paper should be flushed.
- 10 Place trash cans in all restroom stalls to keep everything but toilet paper out of the toilet.

WATER

/ 95

- 5 Do not leave water running. Turn off water-using equipment when not in use.
- 5 Check for and repair leaks.
- 5 Monitor your water bill for unexpected changes, which could indicate leaks or equipment malfunctions.
- 5 Install bathroom faucet aerators with a flow rate of no more than 0.5 gpm (gallons per minute).
- 10 Install WaterSense toilets that use no more than 1.28 gpf (gallons per flush).
- 10 Install low-flow urinals that use no more than .125 gpf (gallons per flush).
- 10 Sweep or mop floors and mats instead of hosing them down.
- 10 For any landscaping, select drought-tolerant plants.
- 10 For any landscaping, install electronic weather-based controller or change watering schedule to match changing weather.
- 10 Use a commercial car wash that reuses water for fleet washing. Do not wash fleets onsite.
- 15 If your site has a cooling tower, install an electronic level controller.

COMMUNITY

/ 40 **Community Points**

- 5 Provide annual (at minimum) training for employees on the sustainability best practices listed in this checklist.
- 5 Support another EnviroStars business!
- 5 Communicate sustainability practices to customers.
- 10 Have an employee or green team supported by management to implement sustainability efforts.
- 15 Have a written environmentally preferable purchasing plan that guides purchasing decisions.

OTHER

We understand that every business is unique and may be taking environmental, economic, and/or other social sustainability actions that aren't reflected on this checklist. We encourage you to list any additional actions below.
